

## Custom Passive EQ with Valve Output Stage

The EQ shown below is a predecessor to our current equaliser. It resides in Isonoe's demo room and is a one-off.

The EQ has the following features:

- Passive filters, based around 10 custom-wound inductors
- Class A valve output stage
- Mu-metal core / shielded input transformer
- Amorphous core output transformer
- Front panel machined in 10mm alloy
- Recessed and backlit control knobs
- Custom CNC-machined knobs
